

smaXtec **BASE STATION**

The **smaXtec Base Station** automatically receives data from the system's sensors in real-time. The data is transmitted to the server and stored in the online database. The Repeater can be used to extend the network range.

TECHNICAL DETAILS:

- Modell: US-3046 (for North and South America); BX-3046 (for EU and other countries)
- Dimensions: 200 × 110 × 60 mm (L × W × H)
- Dustproof and waterproof (IP65) with smaXtec Ethernet cable connected
- or with included rubber seal
- Antenna for communication with smaXtec Sensors (max. distance 10–30 m/32–98 ft)
- Antenna for communication with smaXtec Repeater (max. distance between read-out stations 100 m/328 ft)
- Device available with GSM/without GSM
- Ethernet socket: for internet connection
- Supplied mains adapter: 100–240 V, 2 A
- Easy to mount on a wall or wooden post etc.
